THE HARMONISED INPUT-OUTPUT TABLES AND THEIR USES

The harmonized input-output tables

Data available

An input-output table gives a complete, consistent and detailed description of all flows of goods and services between the branches of the economy of a country and between that country and the rest of the world. It presents a description of the economic structure of a country. At international level, EUPOSTAT's harmonized input-output tables enable one to compare the economic structures of the Member States of the EEC for a given year, and to compare the medium-term development of their structures.

EUROSTAT now has(*) "five-yearly" harmonized input-output tables for each of the Member States for the years 1959, 1965 (for six countries) and 1970 (for nine countries). The next part of this series of tables, referring to the year 1975, should be made available to EUPOSTAT between September 1979 and mid-1980.

One essential characteristic of the five-yearly tables is the existence of tables showing imports (see page 8), allowing a detailed analysis of the relations of the branches with the rest of the world.

EUROSTAT also has input-output tables without detailed tables of imports, compiled on an annual basis from 1971 onwards. In accordance with the European System of integrated economic accounts (ESA), these tables are prepared when the definitive annual national accounts are drawn up. In recent years it has been found that certain countries are unable to send EUPOSTAT annual input-output tables. The input-output tables available are those referring to the years 1971 to 1974 (for Italy), 1971 to 1973 (for France and the Netherlands), and 1971 and 1972 (for the United Kingdom).

The input-output tables are drawn up by the national statistical institutes using a common method (with the same nomenclature, valuation and conventions) which is

(*) Requests for these data, which are available in the form of computer printout or on magnetic tape, should be sent to Division B 2 of EUROSTAT.

set out in the ESA. Hence the economic variables embodied in the input-output tables are consistent with the data in the annual national accounts.

Level of detail

The level of detail for the five-yearly and annual input-output tables is 44 branches of economic activity, defined by reference to the NACE-CLIO nomenclature, in the following categories : 'Agriculture, forestry and fisheries' (one branch); production of energy goods (five branches); manufacturing industry (twenty branches); 'building' (one branch); market services (thirteen branches) and non-market services (four branches).

While this level of detail is inadequate for economic studies relating to individual products, it does provide enough detail for a breakdown of macroeconomic variables into major sectors. In addition, the level of 44 branches is a convenient intermediate level allowing a satisfactory transition between the various national nomenclatures and the Community nomenclature.

Tables of imports

In the five-yearly input-output tables gathered by EUPOSTAT, each item in the table of intermediate consumption and the table of final uses is broken down into three components, corresponding to the origin of the goods and services concerned :

- goods and services produced in the country
- goods and services imported from the rest of the EEC
- goods and services imported from non-member countries.

The five-yearly input-output tables therefore include, in addition to the usual tables (showing intermediate consumption, final uses, primary inputs and resources), two tables of imports (EEC and non-member countries) showing in detail the uses of imported products.

This information is essential for the preparation of the input-output table for the whole of the Community; here the national input-output tables converted into a single unit of account are added together and intra-Community trade must be shown separately in each cell of the tables and entered as 'Community' production. EUROSTAT has drawn up a consolidated input-output table of this kind

for the whole of the Community for the years 1965 (for the Six) and 1970 (for both the Six and the Nine).

The information given in the tables of imports is also extremely useful in many economic studies. For example, it can be used for international comparisons of the amount of Community imports contained directly in a branch's input, or to measure the gradual integration of the Member States' economies by calculating the direct and indirect content of Community imports for a given product at different periods.

Time limit for compilation of input-output tables

The agreements between EUROSTAT and the national statistical institutes state that the five-yearly input-output tables must be provided four years after the end of the reference period (hence at the end of 1979 for the 1975 tables). This period is three years for the annual tables. This length of time is required because of the large quantity of detailed information to be collected and the need to reconcile large numbers of statistics from different sources and of different quality (such as industrial surveys, tax data, external trade statistics and specific surveys). It is not unusual, in several countries, for the collation work required for producing a definitive input-output table to take three years after the end of the reference period. Also, in certain Member States which have retained a system different from the Community one for national purposes, the national table has to be converted into Community terms, which further delays the completion of the tables.

During periods of regular growth and relative price stability, economic structures could be considered as stable, and these delays were of little consequence for users. However, because of the structural changes which have occurred since 1973, some doubt has been cast on the aptness, for certain current economic applications, of using the 1970 structure as such. However the fact remains that the structure and detail of the tables do make it possible to update, on the basis of more recent partial information, the main parameters for the models derived from the input-output tables.

Other data linked with the input-output tables

Other more recent and less detailed data consistent with the input-output tables can be used in conjunction with them, namely :

- annual national accounts for individual branches, relating to : value added, employment (25-branch level), consumption of households by function, and capital formation by branch and product;
- external trade statistics, grouped according to the branches of activity shown in the input-output tables.

These data are at present available for each year up to 1977 for most of the Member States.

Uses of the EUROSTAT input-output tables

Measurement of interrelationships

Calculations using the technical coefficient matrices and the inverse matrix, based on classic hypotheses of the proportionality of a branch's purchases to its level of production, can be used to measure the links between one branch and another, or indeed between final uses and primary inputs.

In this way, EUROSTAT used the input-output table for the years 1959, 1965 and 1970 to calculate the direct and indirect contents of value added and imports of each of the products, for each Member State. By using the detailed data on external trade, it was also possible to calculate the demand created in each

Member State by an increase in the consumption of households in a given country (*).

These calculations are also carried out at the request of Commission departments. Recently, for example, requests have been received to calculate :

- imports induced by exports, for each Member State;
- the energy content of the principal industrial products.

Impact calculations

EUROSTAT has developed two impact models; these are input-output models corresponding to Leontief's classic hypotheses :

- The production model, which takes a final demand specified by the user as the basis for calculating the direct and indirect effects of this demand on each branch and on the economy as a whole, in terms of production, value added, compensation of employees, indirect taxes, etc.

These impact calculations are carried out at the request of users. In the past two years, 240 impacts have been calculated in response to requests received from Commission departments, the European Investment Bank and various university institutes.

- The price model, which, under given assumptions of increases in the prices of imported products or in the amount of primary inputs (wages or taxes), calculates the induced increases in the prices of the output of branches, and the increase in implicit prices for the various categories of final demand (consumption of households, capital formation).

(*) This type of calculation is described in the article entitled 'The harmonized input-output tables for the EEC countries and their use to compare the economic structures of the EEC member countries' presented by C. DEWALEYNE and J.M. SEYLER at the 7th International conference on input-output techniques held in Innsbruck in April 1979.

In recent months, such calculations have been carried out at the request of Commission departments as part of the work to study the repercussions of oil price increases.

By their very nature, these models are built for simulation exercises. Exogenous changes in technical coefficients or import shares can be introduced at the request of users.

. Future work

1. Between now and mid-1980, most of EUPOSTAT's work on the input-output tables will be devoted to processing the 1975 tables received from the Member States (and Greece and Spain), which will involve : checking data, harmonizing the tables, and distributing the raw data and the main structural parameters calculated from the tables to users. Since the methodology for the 1975 tables is identical to that used for the 1970 tables, it will be possible to study the economic development of the countries over this period, and to assess the effects on their economic structure of the events which have occurred since 1973.
2. The updating of the existing impact models with 1975 data does not pose any problems. Also, work is already in progress to collect more recent data on national accounts and external trade (up to 1978), so that the main coefficients used in the models can be updated as quickly as possible.
3. 1980 will also see the introduction, alongside the 1975 input-output tables, of data expressed in physical quantities showing production, imports and uses of energy goods for each of the branches. Thus in autumn 1980 we will have a consistent set of data, for the main Community countries, describing flows of energy goods in terms of both value and quantity, with a good level of detail (differentiating between 10 types of energy goods). The data will, like those expressed in

terms of value, be updated to 1978. It will then be possible to measure the direct and indirect energy content of each of the products in detail, and to gauge the impact in terms of energy resources of different final demands (exports, investment projects, households' consumption, etc.). Work has already started on programming the calculations for the Energy input-output tables, coordinated by the Energy Statistics Division of EUROSTAT.

Editions DA, DE, EN, FR, IT, NL published in October 1979

A selection of the Community's basic statistics and a comparison with a number of other European countries, plus the USA, Japan and the USSR. This selection covers the following subjects :

- Population
- Labour force
- Research and education
- National accounts
- Agriculture
- Energy
- Industry
- Transport
- External trade
- Prices
- Earnings and hours of work
- Social accounts
- Standard of living
- Finance
- Regional population and gross domestic product.

Editions DA/DE/IT, EN/FR/NL published in September 1979

Volume 2 will be published in November 1979

Detailed results of the national accounts of the Member States in accordance with the ESA (European System of Integrated Economic Account

- The first volume gives data on transactions in goods and services (value added, final consumption of households, gross fixed capital formation and figures on a comparable basis for the occupied population and wage and salary earners) as well as financial transactions (change in assets and liabilities).
- The second volume presents the distributive transactions such as compensation of employees, property income, social contributions, etc between the institutional sectors (eg. households, companies, government). Supplementary tables analyse compensation of employees and social benefits and contributions in more detail.

169 pages Format A 4

Edition EN/FR published in August 1979
Editions DA/NL, DE/IT Published in October 1979

This volume presents the most recent available data on the geographical breakdown of the balance of payments of each European Community country and of the United States and Japan.

The balances of the European Community countries are also given, where possible, in the form of totals relating to the nine Member States (EUR 9) as a whole.

The data are expressed in millions of ECU; they are presented according to the EUROSTAT balance of payments and geographical breakdown schemes, and cover the period 1973 to 1977. The figures are preceded by two notes concerning, respectively the drawing up of a consolidated balance of payments of the European Community countries and the balance of payments of the Community institutions.

Regional accounts - Economic aggregates

ISBN 92-825-1101-4	Price : UKL	16.90
	DKR	176
Approximately 235 pages Format A 4	USD	33.50
	BFR	1 000

Multilingual edition to be published in November 1979

Main economic aggregates for the basic administrative units of the Community. Detailed presentation of the results for 1973 and a comparison with those for 1970, 1971 and 1972.

Green series : EC-Indices of purchase prices of the means of agricultural production 1970-1978

ISBN 92-825-1312-2	Price : UKL	5
	DKK	52.80
	USD	10
	BFR	300

85 pages Format A 4

Multilingual edition published in September 1979

This publication presents for EUR 9 and each of the member countries the evolution, over the period from 1970 to 1978 of the annual indices of the purchase prices of the means of agricultural production.

The publication also contains the evolution of the monthly indices from January 1977.

Fisheries - Products and fleet 1976-1977

ISBN 92-825-1130-8

Price : UKL 11.50
DKR 123
USD 24.80

145 pages Format A 4

Multilingual edition published in October 1979

This volume of fishery statistics is in two parts : the first gives supply balance sheets for fishery products for the Member States of the EC for the years 1976 and 1977. The second part gives the statistics on catches, quantities and values of landings, unit values and the fishing fleet.

Ruby series : Energy statistics yearbook 1973-1977

ISBN 92-825-0880-3

Price : UKL 13.50
DKR 141
USD 27
BFR 800

Approximately 350 pages Format A 4

Multilingual edition published in September 1979

The Energy statistics yearbook groups in a single publication an extensive volume of statistical information relating to the energy economy of the Community and the Member States in recent years.

The first chapter covers energy economic indicators and the overall energy balance sheet of the Community and of each of the nine Member States. These balance sheets, called 'primary input energy' balance sheets, whose methodology, particularly where electrical energy is concerned, is based on the energy equivalents for substitution of energy sources at the supply stage, are drawn up in tonnes of oil equivalent and broken down by product.

The succeeding chapters give the balance sheets and a number of important historical series expressed in physical units of each energy source.

The annex contains 'energy supplied' balance sheets for the most recent year available in which all operations are entered in terms of the actual energy content of each source and form of energy without any substitution being assumed or any equivalence calculated. To make this documentation easier to handle, it is arranged in loose sheets giving the balance sheets in specific units on the one hand and in terajoules on the other, both for the Community and for each of the Member States.

Operation of nuclear power stations during 1978

ISBN 92-825-1320-3	Price : UKL	6.20
	DKR	71,80
	USD	13.60
	BFR	400

129 pages Format A 4

Edition EN/FR published in September 1979

This annual publication presents in its first part the main operating statistics for the past year and gives an outline of the structure of the nuclear plant situation, with units on line as well as units under construction. The second part of the publication gives the monthly operating data for each nuclear power station of the Community as well as the yearly results since the first connection to the grid. The annual load diagrams are also included showing the main reasons for unavailability.

SPECIAL PUBLICATIONS AND SERIES

Purple series : Regional statistics - Population, employment, living standards - 1977

ISBN 92-825-1100-6	Price : UKL	8.40
	DKR	88
	USD	17.80
	BFR	500

Approximately 200 pages Format A 4

Multilingual edition to be published in November 1979

The updating for 1977 of the 'Regional statistics - Population, employment, living standards 1975' contains the most recent statistics on social conditions in the 140 regions of the European Communities :

- Total population and population growth, births, deaths, trends in birth and death rates, age structure, trend of population, interregional movement of population.
- Employment and structure of employment broken down by sex, age, categories of activity, branches of activity.
- Registered unemployment.
- Indicators of the quality of life, physical environment, education, health, miscellaneous indicators of standard of living, workers' earnings.

The yearbook includes a folding map of the regions and 12 maps illustrating the main topics.

Volume 3 - Results by size of establishments	Price : UKL	4
ISBN 92-825-0331-3 approximately 114 pages	DKR	42
	USD	8
	BFR	240

This publication contains the methodology and detailed results of the Community survey of labour costs in industry 1975.

The results cover the number of establishments and employees, the number of hours worked, and the level and structure of labour costs in different industries (73 groups of the divisions 1-5 of the NACE).

The results are published in four volumes, as follows :

Volume 1 : General results by countries and industries

Volume 2 : Structure of labour costs

Volume 3 : Results by size of establishments

Volume 4 : Regional results.

Green series : Community survey of orchard fruit trees - 1977

ISBN 92-825-1228-2	Price : UKL	10.70
	DKR	125.90
	USD	24
	BFR	700

Approximately 180 pages Format A 4

Multilingual edition to be published in November 1979

The publication contains the most recent statistics on the 500 000 hectares of commercial orchards under apples, pears, peaches and oranges in the EEC. The tables provide details of age of orchard and density of plantation for the main fruit varieties of each species in individual Member States and production zones. The information was collected by special surveys under Council Directive 76/625/EEC. A description of the survey methods for each country, together with some historical statistics, is given.

Agricultural statistical studies No 20 (Dr. Kurt Häfner)

ISBN 92-825-0169-8	DE	Price : UKL	5

Editions DE and FR published in 1978
Edition EN to be published in November 1979

This study presents a detailed and systematic summary of current knowledge on agricultural supply balance sheets. In addition to the "philosophy" of these balance sheets, the system and techniques of the different types of balance sheets are also commented upon. The calculation of the degree of self-sufficiency as well as the questions raised by the use of physical or monetary units are also described. Finally the author, who before retiring as Head of a Directorate-General of the Ministry of Agriculture in Bonn was, inter alia, responsible for balance sheets, looks into their use as an aid to policy decisions affecting agriculture.

Olive green series : Analysis of trade between the European Community and the ACP States

Approximately 100 pages Format A 4 monthly (11 issues per year)

2 three-language editions (FR/DE/NL), (EN/IT/DA)
to appear at the beginning and in the middle of each month

The publication is intended to provide a selection of the most significant indicators of the trends in employment, production, external trade, prices, finance and the balance of payments for the Member States, the Community as a whole and the United States. The indicators will be expressed in the form of indices relating as far as possible to seasonally adjusted series. The bulletin will be available in two three-language editions which will appear alternately at the beginning and in the middle of each month.

Yellow series : Hourly earnings - Hours of work

ISSN 0378-3596

Annual subscription :	UKL	9.80
	DKR	105.00
	USD	19.40
	BFR	600

Approximately 266 pages Format A 4 half-yearly

This publication which is updated every 6 months contains harmonized data on workers' hourly wages, on labour costs and weekly hours worked, plus indices of developments in employees' monthly salaries in industry. These data are broken down according to NACE, and, for certain countries, by region. This publication also contains some data on the earnings and conditions of employment of permanent workers in agriculture.

Approximately 120 pages Format A 4 11 issues per year

The most recent information on

Crop production of arable land (area, yield, production)

- 1) or Fruit and vegetable production (area, yield, production)
- 2) Areas sown (twice a year)
- 3) Stocks and deliveries of cereals and potatoes
- 4) Meteorological report
- 5) Supply balances for crop products (3 or 4 per year).

Monthly statistics of meat

ISSN 0378-3553

Annual subscription : UKL 41
DKR 437
USD 80.50
BFR 2 500

Approximately 85 pages Format A 4 10 issues per year

Publication of statistics supplied by Member States in application of the Council's Directives 68/161/EEC and 73/132/EEC concerning surveys to be carried out in the cattle and pig sectors.

The bulletin contains monthly information on slaughterings, on foreign trade in live animals, on production by species and by country. In addition, it may also give information about supply balances, foreign trade in meat, livestock, structure of cattle or pig holdings, short term development of production.

Monthly statistics of milk

ISSN 0378-3545

Annual subscription :	UKL	22.90
	DKR	245
	USD	45
	BFR	1 400

Approximately 40 pages Format A 4 10 issues per year

Publication of statistics transmitted by Member States in compliance with the 'Council directive of 31st July 1972, on the statistical surveys to be made by Member States concerning milk and milk products' (72/280/EEC). The bulletin contains the data relating to cows milk collected and the main products processed by dairy industry. From time to time the bulletin may contain supply balance sheets, information on dairy structure or external trade statistics.

Monthly statistics of eggs

ISSN 0378-3537

Annual subscription :	UKL	24
	DKR	262,50
	USD	48.50
	BFR	1 500

Approximately 40 pages Format A 4 10 issues per year

Publication of statistics transmitted by Member States in compliance with the Council regulation 2782/75 on the commercialisation of hatching eggs and farmyard poultry chicks. The bulletin contains monthly by species data on incubation of eggs as well as production and external trade in chicks. In addition the bulletin may contain data on structure and utilization of hatcheries, on supply balance sheets or on external trade in eggs and poultry meat.

Selling prices of vegetable products

ISSN 0378-6714

Annual subscription :	UKL	22.10
	DKR	236
	USD	43.50
	BFR	1 350

Approximately 133 pages Format A 4 bi-monthly

This bulletin presents the monthly and annual up-dating of the prices of the most important vegetable products and of a number of products processed by the food industry. The prices for EUR 9 are given in national currency and in EUA as well. The percentage variations refer to the previous month and to the same period of the year before. The monthly evolution of the prices of almost all products is illustrated also by graphs.

Selling prices of animal products

ISSN 0378-6622

Annual subscription :	UKL	22.10
	DKR	236
	USD	43.50
	BFR	1 350

Approximately 163 pages Format A 4 bi-monthly

This bulletin presents the monthly and annual up-dating of the prices of the most important animal products and of a number of products processed by the food industry. The prices for EUR 9 are given in national currency and in EUA as well. The percentage variations refer to the previous month and to the comparable period of the year before. The monthly evolution of the prices of almost all products is illustrated by graphs.

Purchase prices of the means of production

ISSN 0378-6692

Annual subscription :	UKL	11.50
	DKR	122.50
	USD	22.50
	BFR	700

Approximately 110 pages Format A 4 quarterly

This quarterly bulletin presents up-dated monthly and annual prices of the most important products bought by the farmers. The series for EUR 9 cover animal feed, fertilizers, transport and heating fuels, seeds and pesticides.

Indices CE des prix à la production

ISSN 0378-6706

Annual subscription :	UKL	4.90
	DKR	52.50
	USD	9.70
	BFR	300

Approximately 30 pages Format A 4 quarterly

This publication shows for EUR 9 and each of the Member States the evolution of the monthly indices of the producer prices of agricultural products during the last 12 months.

In order to permit rectifications and facilitate comparisons, the first quarterly issue of this year comprises the trends of the annual indices since 1971 and of the monthly indices during the last two calendar years.

EC-Indices of the price of the means of production

ISSN

Annual subscription :	UKL	4.90
	DKR	52,50
	USD	9.70
	BFR	300

Approximately 40 pages Format A 4 quarterly

This publication shows for EUR 9 and each of the Member States the evolution of the indices of the purchase prices of the means of agricultural production during the last 12 months.

In order to permit rectifications and facilitate comparisons, the first quarterly issue of this year comprises the trends of the annual indices since 1971 and of the monthly indices during the last two calendar years.

Quarterly bulletin of fisheries

ISSN 0379-0029

Annual subscription :	UKL	9.80
	DKR	105
	USD	19.40
	BFR	600

Approximately 76 pages Format A 4 quarterly

This quarterly publication contains the monthly data on the landings (quantities and values) of the more important fish species in Community ports. In the earlier numbers, compiled from national publications, will be a degree of non-harmonized data but as the series progresses, harmonisation will be improved.

Blue series : Industrial short-term trends

ISSN 0378-7427 FR
ISSN 0378-7877 EN
ISSN 0378-8008 DE

Annual subscription :	UKL	8
	DKR	87,50
	USD	16.25
	BFR	500

Approximately 60 pages Format A 4 monthly (11 issues per year)

Publication of short-term industrial indicators, comments and graphs. The publication contains indices of industrial production for about 40 industrial branches and groups of branches, indices of turnover, new orders, employees, wages and salaries and hours worked.

Two methodological supplements will complete the regular monthly publication.

Turquoise series : Quarterly iron and steel bulletin

ISSN 0378-3510

Annual subscription :	UKL	16
	DKR	175
	USD	32.50
	FRF	1 000

Approximately 133 pages Format A 4 quarterly

Annual, quarterly and monthly statistics on employment, consumption of raw materials, production of iron ore, pig-iron, crude steel, finished steel products and end products, on works deliveries and receipts, stocks, on external and internal ECSC steel and scrap trade and on apparent steel consumption.

Monthly bulletin - Iron and steel

ISSN 0378-7559

Annual subscription :	UKL	7.40
	DKR	78,50
	USD	14.50
	FRF	450

Approximately 15 pages Format A 4 monthly (11 issues per year)

Short term economic statistics (monthly) on production of pig-iron, crude steel, steel mill products, index of production, new orders, deliveries and order books, external trade of ECSC steel products, consumption and receipts of scrap and number of short time workers.

Ruby series : Hydrocarbons - Monthly bulletin

ISSN 0378-3731

Annual subscription :	UKL	9.80
	DKR	105
	USD	19.40
	FRF	600

Approximately 30 pages Format A 4 monthly (11 issues per year)

Produce monthly the principal statistical series characterising the short term movements in the petroleum and gas industries.

Coal - Monthly bulletin

ISSN 0378-357X

Annual subscription :	UKL	4.90
	DKR	52,50
	USD	9.70
	BFR	300

Approximately 20 pages Format A 4 monthly (11 issues per year)

Produce monthly the principal statistical series characterising the short term movements in the coal industry.

Electrical energy - Monthly bulletin

ISSN 0378-3561

Annual subscription :	UKL	4.90
	DKR	52,50
	USD	9.70
	BFR	300
